

NB-600 Plastic Spiral Coil Forming Machine

Advantages:

Through the water tank's heating, the PVC PET PP material wire would form with mould,then cooling by cold water.

Auto feeding the material ,make sure it is steady on the process of heating and forming

Use the double stainless steel temperature-holder box,more power-saving and beautiful

Touch-screen makes it accurate and convenient to set and operate

By changing the mould could make different size of wire

Max. Forming speed: 1200pcs/min

Specifications:

Max forming size:	2 inch
Min forming size:	3/16 inch
Pneumatic:	4-6 Pa
Forming Speed:	500-1200 loops/min
Machine Weight:	200KG
Power Supply:	220v/50Hz
Power:	1000W
Machine Dimension:	3m x 1m x 1.2m
